THE END OF TUBERCULOSIS

Stamping Out the Disease.

By HOMER FOLKE.

There is absolute unanimity, too, among our expert authorities (as there was not a decade ago) as to just what we need to do in order to prevent tuberculosis. We must have general public education as to the nature and symptoms of the disease, and we have it. We must have free dispensaries for reporting of cases by physicians, and we are getting it. We must have free dispensaries in every city and considerable village at which any person can secure an expert and thorough diagnosis of his condition and adequate instructions as to what he must do, and we are getting dispensaries. We must have visiting nurses to visit the patients in their homes and instruct them, not once, but many times, in the protection of their households. We are getting visiting nurses. We need, above all, hospitals in the larger cities and a county hospital in every county, and we are getting hospitals.

GOOD COMBINATION

In introducing Judge O'Rear, Monday, the speaker said that he weighed 140 lbs., 100 of which was backbone and the other 40 lbs. brains. A pretty good combination out of which to make a Governor.
